This Key Information Memorandum is dated **June 23, 2017**.

Investment Objective	The primary objective of the Scheme is to generate current income by investing predominantly in well diversified portfolio of Fixed Income Securities and Money Market Instruments with moderate risk levels. This income may be complemented by possible Capital Appreciation.	
Asset Allocation Pattern of the scheme	Types of Instruments	Normal Allocation (% of Net Assets)
	Money Market Instruments	Approx 10-20
	Fixed Income Securities	Approx. 80-90 (maximum 100)
	Equity & Equity Related Instruments	Approx. 0-10 (maximum 20)
	Units of other Mutual Fund Scheme(s)	Approx. 0-5 (maximum 5)
Investment Strategy of the Scheme	The investments shall be made in a well diversified portfolio of Fixed Income Securities/ Securities issued/guaranteed by the Central, State Government and Local government / high investment grade corporate debt.	
Risk Profile of the Scheme	<p>Mutual Fund investments are subject to market risks. Please read the SID carefully for details on risk factors before investment. Scheme specific risk factors are summarized below:</p> <ol style="list-style-type: none"> 1. The inability to sell the money market or debt securities held in the Scheme's portfolio due to the absence of a well developed and liquid secondary market for such securities may result, at times, in losses to the Scheme, in case of a subsequent decline in the value of such securities. 2. The liquidity of the debt investments is inherently restricted by trading volumes and settlement periods. In the event of an inordinately large number of redemption requests, or of a restructuring of the scheme's portfolio of investments, these periods may become insignificant. 3. The debt securities are subject to risk of an issuer's inability to meet principal and interest payments on its debt obligations and market perception of the creditworthiness of the issuer Due to this risk, corporate debentures are sold at a higher yield above those offered government securities, which are sovereign obligations and free of credit risks. 	
Risk Mitigation	<u>Risk & Description specific to Debt</u>	<u>Risk Mitigants / Management Strategy</u>
	<u>Default Risk</u>	This shall be arrested by investing in papers which have high safety. Further this risk is minimal in case of securities issued by central / state government/.
	<u>Interest Rate Risk</u>	This shall be reduced by increasing the average duration of portfolio when interest rate is expected to decline and decrease the average duration when interest rate is expected to rise. This will minimize the negative impact of adverse movement of interest rate.
	<u>Liquidity Risk</u>	This shall be avoided by keeping away from investment in thinly traded securities or securities with lower volumes.
