**This Key Information Memorandum (KIM) sets forth the information, which a prospective investor ought to know before investing. For further details of the scheme/Mutual Fund, due diligence certificate by the AMC, Key Personnel, investors' rights & services, risk factors, penalties & pending litigations, associate transactions etc. investors should, before investment, refer to the Offer Document available free of cost at any of the Investor Service Centres or distributors or from the website [www.escortsmutual.com](http://www.escortsmutual.com).**

**The Scheme particulars have been prepared in accordance with Securities and Exchange Board of India (Mutual Funds) Regulations 1996, as amended till date, and filed with Securities and Exchange Board of India (SEBI). The units being offered for public subscription have not been approved or disapproved by SEBI, nor has SEBI certified the accuracy or adequacy of this KIM.**

This Key Information Memorandum is dated **June 23, 2017**.

<b>Investment Objective</b>	The investment objective of the Scheme is to provide income distribution and / or medium to long term capital gains by investing predominantly in equity/equity related instruments of the companies in the infrastructure sector.	
<b>Asset Allocation Pattern of the scheme</b>	<b>Types of Instruments</b>	
	Equity & Equity Related Instruments of the companies in Infrastructure Sector	<b>Normal Allocation (% of Net Assets)</b> 65 -100
	Debt Instruments, Govt. Bonds, Money Market Instruments etc. Investment by the scheme in securitised debt, will not normally exceed 40% of the debt component of the scheme.	0 - 35
<b>Investment Strategy of the Scheme</b>	The Scheme will invest in companies, which, in the opinion of the Investment Manager, offer an attractive investment opportunity to participate in the growth of the infrastructure sector. These may be across the above-mentioned sectors or other areas of Infrastructure as may be identified by the Fund. The stocks may be at any levels of market capitalization and Fund Manager will use growth investment styles. There will be no restrictions on the level of participation in any of the above industries, except for the Seventh Schedule restrictions as prescribed under the SEBI (Mutual Fund) Regulations, 1996. These sectors are only indicative and this could undergo change based on future reforms and developments.	
<b>Risk Profile of the Scheme</b>	<p>Mutual Fund investments are subject to market risks. Please read the SID carefully for details on risk factors before investment. Scheme specific risk factors are summarized below:</p> <ol style="list-style-type: none"> <li>1. The investments under the Scheme are oriented towards equity/equity related securities of Companies belonging to the infrastructure industries and hence will be affected by risks associated with the infrastructure industries. Further amongst the infrastructure sector as defined under the investment strategy the majority of the equity/ equity oriented investments could be under the single sector. Hence if the said sector does not perform positively as expected by the Fund Manager of the Scheme, the Schemes' performance may be adversely affected due to a risk associated with non-diversification and thus could affect the value of investments.</li> <li>2. Although the Scheme seeks to make investments in equity and equity related securities of the Infrastructure sector, this scheme will not be a sector specific scheme for the purpose of monitoring the investment restrictions applicable to the Scheme and hence investments per issuer under the Scheme will not exceed 10% of the net assets of the Scheme.</li> <li>3. As the Scheme may hold securities that are not in the S&amp;P CNX Nifty Index and may invest in limited number of sectors with higher concentration to certain sectors and industries, it may perform differently from the general stock market. Further Schemes' performance may differ from the benchmark index to the extent of the investments held in the debt segment, as per the investment pattern indicated under normal circumstances.</li> <li>4. Given that the Scheme seeks to invest in equity/ equity related securities of the Companies belonging to the infrastructure sector and that the investment concentration may be high in certain companies belonging to the said sector, the volatility and/or performance of the said sector and/or of the scrips belonging to this sector can have a material adverse bearing on the performance of the Scheme.</li> </ol>	
<b>Risk Mitigation</b>	<u>Risk &amp; Description specific to Equities</u>	<u>Risk Mitigants / Management Strategy</u>
	<u>Quality risk</u> Risk of investing in unsustainable/ weak companies.	Investment universe carefully selected to only include high quality businesses.
	<u>Price risk</u>	"Fair value" based investment approach supported

	Risk of overpaying for a company.	by comprehensive research.
	<u>Risk of fluctuations in the value of the investment portfolio</u>	The Scheme may use techniques and instruments such as futures and options etc. to hedge the risk of fluctuations in the value of the investment portfolio. The scheme may enter into derivatives transactions in a recognised stock exchange for the purpose of hedging and portfolio balancing in accordance with the guidelines and circulars issued by SEBI from time to time.
	<u>Concentration risk</u>	In order to diversify individual company risk, the fund will on an average and under normal circumstances invest across companies across various sectors. The quantum of exposure shall be decided on the basis of relative earnings, growth, valuations and potential valuations. As the fund intends to hold less number of stocks than a diversified growth fund, the NAV volatility (risk) will be higher than normal.
	<u>Volatility</u> Price volatility due to company or portfolio specific factors	Control risk class/sector/stock exposures to control overall portfolio volatility.

	<u>Security specific risk</u>	The overall portfolio structuring would aim at controlling risk at moderate level. Security specific risk will be minimised by investing only on those companies that have been thoroughly researched in-house. Risk will also be managed through broad diversification of the portfolios within the framework of the Schemes' investment objective and policies.
	<u>Liquidity Risk</u>	Risk will be monitored in terms of the number of days it takes to liquidate every stock in the portfolio assuming a share of the average volume traded over the previous one year. Efforts would be made to keep the average liquidation period under prudent limits prescribed internally.
	<u>Default Risk</u>	This shall be arrested by investing in papers which have high safety. Further this risk is minimal in case of securities issued by central / state government/.
	<u>Interest Rate Risk</u>	This shall be reduced by increasing the average duration of portfolio when interest rate is expected to decline and decrease the average duration when interest rate is expected to rise. This will minimize the negative impact of adverse movement of interest rate.
	<u>Liquidity Risk</u>	This shall be avoided by keeping away from investment in thinly traded securities or securities with lower volumes.
<b>Plans and Options</b>	<p>The investor can opt for the following:</p> <p>A. Regular Plan (For applications routed through Distributors):</p> <ol style="list-style-type: none"> <li>1. Growth (Capital Appreciation)</li> <li>2. Dividend (Regular Income)</li> </ol> <p>B. Direct Plan (For applications not routed through Distributors):</p> <ol style="list-style-type: none"> <li>1.
